DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 22-27, drawn to methods of producing 8-nitroguanine, classified in class 544, subclass 277.
- II. Claim 15, drawn to a method of use of 8-nitroguanine classified in class 544, subclass 277.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as production of 8-nitroguanine as a starting material for further synthesis. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with Richard Nakashima on September 25, 2003, an election was made without traverse to prosecute the invention of Group I, claims 1-13 and 22-27. Claim 15 has been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claim 15 to an invention, non-elected without traverse. Accordingly, claim 15 has been cancelled.
